

GLASS RENOVATOR

POWDER FOR REJUVENATING GLASSWARE

Glass Renovator is a glass rejuvenator for use in automatic glass washing machines.

It is a concentrated blend of alkali builders, inhibitors and chlorine release agents recommended for the removal of film and any traces of chemicals that are used in the manufacture of glassware.

As Glass Renovator contains a chlorine donor it is highly effective against both gram-ve and gram+ve bacteria.

PACK SIZE 10 Kilo Tub **CODE:** 0117-0010

USAGE DIRECTIONS

Use 120 grams (2 scoops) of Glass Renovator per 5 litres of glasswashing machine water. Make up solution in machine, place glasses in racks and wash in the machine in the normal way, ensuring that they are thoroughly rinsed before use. Add 60 grams (1 scoop) of Glass Renovator for each additional cycle of glasses washed in the machine.

Please note that foam in the wash tank does **not** mean that you have added too much Glass Renovator, it is normally an indication of excess soil, grease, protein, sugar or yeast in the machine. Add more Glass Renovator will control the foam as it cleans the machine and glasses.

TECHNICAL DATA

Appearance	White powder	Solubility in Water	Soluble
Odour	Slight chlorine	pH (10% solution)	10.5 - 11.5

CLP PICTOGRAM

Signal Word - **Danger**

CLP HAZARD STATEMENTS

H314 Causes severe skin burns and eye damage
H335 May cause respiratory irritation.
H411 Toxic to aquatic life with long lasting effects.

CLP PRECAUTIONARY STATEMENTS

P102	Keep out of reach of children.
P261	Avoid breathing dust.
P273	Avoid release to the environment.
P280	Wear protective gloves / protective clothing / eye protection.
