

MILK MACHINE CLEANER

MILK MACHINE CLEANER FOR "BEAN TO CUP" & AUTOMATIC MACHINES

MILK MACHINE CLEANER is a highly concentrated liquid detergent used for the cleaning of "milk frothers" on cappuccino coffee machines. It affords good detergency for the emulsification of milk residues that can build up on steam wands, valves and tubes on milk frothing equipment.

Daily use of Milk machine Cleaner will keep the equipment running smoothly by removing any organic residues that may cause malfunctioning, or give rise to mould growth or bad smells.

PACK SIZE 12x1 Litre Box **CODE:** 0281-0012

DIRECTIONS - Always follow coffee machine manufacturers instructions.

For "Bean to Cup" coffee machine at the close of business each day: -

Add the required measure of Milk Machine Cleaner and follow the coffee machine manufacturers cleaning instructions.

For Coffee Machines with removable milk frothing parts: -

Dismantle machine as per manufacturers instructions and remove milk frothing parts. Soak parts in a 1:20 solution of Milk Machine Cleaner with hot or boiling water for 2 - 3 hours (or overnight), then thoroughly rinse with fresh clean water and air dry, before reassembling.
